October 29, 2003

The Honorable Rick Santorum  
United States Senate  
511 Dirksen Senate Office Building  
Washington DC 20510

Dear Senator Santorum,

We are writing to ask you for your support to cap the emissions of greenhouse gasses that cause global warming. This is not only environmentally correct but also an important health concern facing our country.

In addition our industry is greatly concerned with the impact global warming and how it has/will adversely impact our ability to provide a quality skiing experience. There is no doubt that global warming will cost us more money to operate our facilities in the future.

Our operating costs including insurance, payroll and utilities are already at an all time high. As an industry, we can ill afford any additional expenses.

Please do what's right and continue your stance as a "friend of the environment" - help stop global warming.

Sincerely,

Gregg A. Confield  
President - PSAA
